

Park Street Collegiate Institute Specialist High Skills Major in Construction offers students an opportunity of a lifetime!

What is the Construction SHSM Pathway?

The Construction Specialist High Skills Major (SHSM) is an innovative, integrated Building Construction pathway that allows the student to progress through the construction process from the design and drawing stage, to the actual construction of a variety of structures.

What do I get to do?

- Design and develop a construction project
- Fabricate a variety of structures ... HANDS ON!
- Experience the design or construction environment through work placements
- Relate your studies in core subject areas to construction!
- Graduate with a SHSM seal of designation on your secondary school diploma
- Earn valuable certifications, work experience and knowledge
- The Ontario Construction Secretariat reports that employment in the Construction sector continues to grow. Sector representatives consider the shortage of skilled workers to be critical. While new home construction may be on a decline in some areas of the province; restoration and renovation opportunities are growing.

When can I get started?

- NOW! ... Talk about your interest with a teacher.
- Apply in your Grade 10 year.

How can I get more information?

Visit your School Guidance Counsellor. Your Guidance Counsellor will provide information about:

- SHSM Print materials
- SHSM Parent-Student Information Evenings
